Math 212 Spring 2006

Quiz **10** **Multivariable Calculus**

Name: _____

Date: _____ **Wednesday April 12**
Time Begun: _____ Ron Buckmire
Time Ended: _____

Topic : Multiple Integration

The idea behind this quiz is to provide you with an opportunity to illustrate your ability to set up and evaluate double and triple integrals.

Reality Check:

EXPECTED SCORE : _____/10 ACTUAL SCORE : _____/10

Instructions:

0. Please look for a hint on this quiz posted to `faculty.oxy.edu/ron/math/212/06`
1. Once you open the quiz, you have **30 minutes** to complete, please record your start time and end time at the top of this sheet.
2. You may use the book or any of your class notes. You must work alone.
3. If you use your own paper, please staple it to the quiz before coming to class. If you don't have a stapler, buy one. **QUIZZES WITH LOOSE SHEETS WILL NOT BE GRADED.**
4. After completing the quiz, sign the pledge below stating on your honor that you have adhered to these rules.
5. Your solutions must have enough details such that an impartial observer can read your work and determine HOW you came up with your solution.
6. Relax and enjoy...
7. **This quiz is due on Monday April 17**, in class. NO LATE QUIZZES WILL BE ACCEPTED.

Pledge: I, _____, pledge my honor as a human being and Occidental student, that I have followed all the rules above to the letter and in spirit.

Math 212 Spring 2006 **SHOW ALL YOUR WORK** Quiz **Ten**

1. (*5 points*) Evaluate $\int_0^4 \int_{\sqrt{x}}^2 \sin(y^3)\, dy\, dx$ **(HINT: there does not exist any function** $F(y)$ **whose derivative** $F'(y)$ **equals** $\sin(y^3)$ **but this integral is calculable.)**

2. (*5 points*) Show that the volume of the tetrahedron bounded by the planes $y = 0$, $z = 0$, $x = 0$ and $y - x + z = 1$ is $1/6$.
